Pneumatic Tires from Continental

Whether in harbor or airport applications, in industry or the logistics sector – the requirements could not be more different. Speed, distance, weight, temperature, humidity, surface conditions and many other factors vary according to the operation, these factors make your business individual.

Special challenges call for special solutions

We have responded to these conditions and have adapted our products to your unique set of requirements.

Our comprehensive product range has evolved from this. We not only offer you a solution to meet your every requirement, but also adapt effectively to every challenge.

Industrial Radial Tires

ContiRT20 Performance

Power and durability

The ContiRT20 Performance is characterized by an outstanding mileage due to the low abrasion tread compound and resistance to damage and cuts even under extreme conditions.

The construction of this tire is specially designed to offer maximum tilting stability and therefore safety when lifting and transporting heavy and fragile loads. That's where the comfort due to reduced vibration and excellent handling of this tire comes into play.

In general the ContiRT20 is your perfect choice when it comes to high productivity and lowest operating costs in tough working conditions.

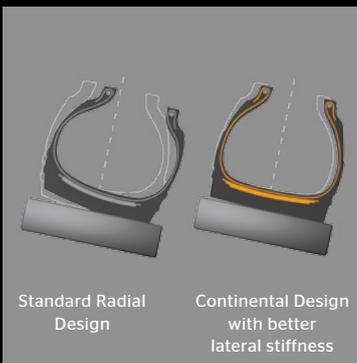

Increased tire life

- Extra deep tread depth and maximum tread wear volume

Reduced energy consumption and CO₂ output via low rolling resistance rubber compounds

Low abrasion tread compound with resistance to damage caused by cuts and tears

Standard Radial Design

Continental Design with better lateral stiffness

Maximum tilting stability

- Wide flat belt construction with reinforced steel beads

Stiffened sidewall technology that can adapt to uneven surfaces

Maximum tread width ensuring total contact between tire and ground

Comfort and traction on soft and uneven surfaces

- Better transmission of forces via radial construction

Heavy duty rugged tread blocks

Multiple angled tread edges

Industrial Radial Tires

ContiRV20 Velocity

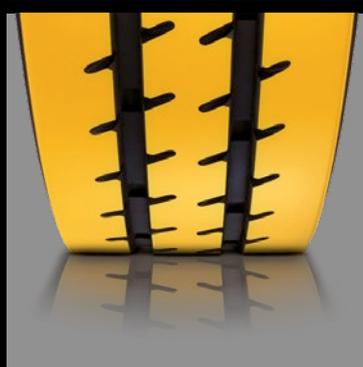

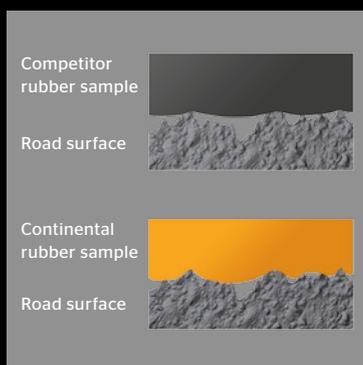

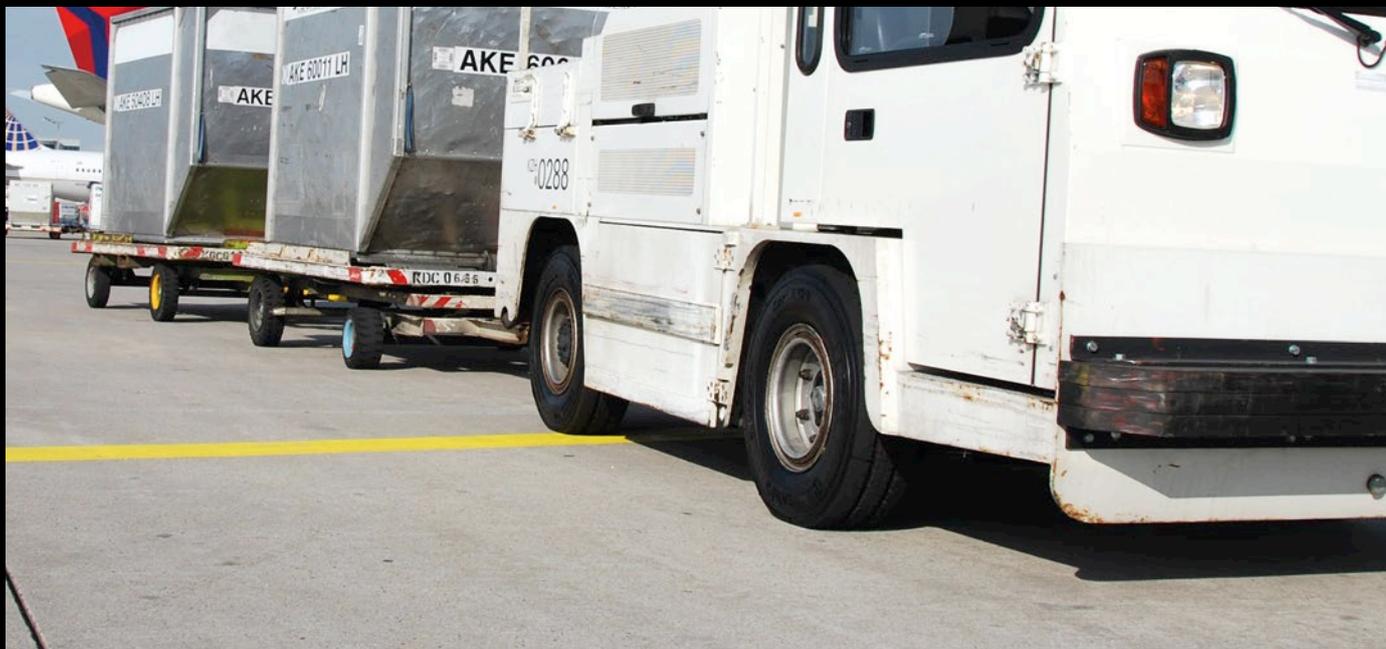

Strength meets speed

The ContiRV20 Velocity offers high productivity and lowest operating costs in fast moving logistic applications.

The improved wet grip and traction capabilities go along with shorter stopping distances and better grip on slippery or sloping surfaces and therefore safety.

Due to the closed shoulder design and the construction of the tire heel and tow wear is eliminated, the tire is high durable and is excellent in comfort and handling.

Low energy consumption

- Radial tire construction for most efficient transmission of drive forces

Reduced energy consumption and CO₂ emission output via low rolling resistance rubber compounds

Wet grip and traction

- Molecular tread compound that grips structure of road surface

Ribbed tread profile for permanent contact with ground surface

Ride comfort and even wear

- Ribbed tread pattern for smooth road contact

Radial tire construction gives optimum damping

Closed shoulder to avoid tearing and elimination of heel and tow wear

Industrial Radial Tires

TractorMaster

High performance for heavy tasks

The TractorMaster is the high-performance radial tire for heavy tasks. Reinforced bead designs make light work of heavy loads. S-shaped cross ribs excel in all weathers, producing outstanding traction, while the closed shoulder design ensures an exceptionally quiet ride. What is more, the low-abrasion tread compound delivers outstanding mileage.

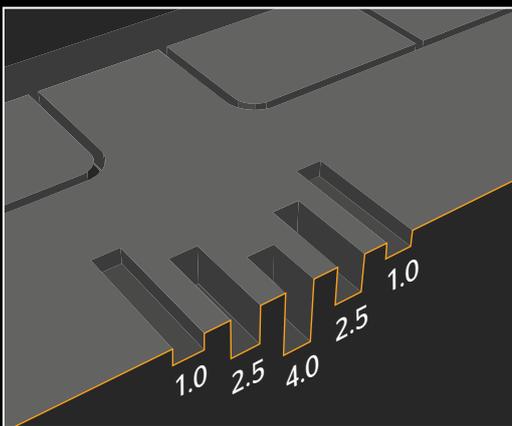

- › Outstanding traction
- › Quiet ride
- › High mileage
- › Low abrasion tread compound

VAI™ - the visual alignment indicator highlights misaligned wheels.

Vibrations in the steering wheel or free rolling steering wheels are clear indicators to the driver that the vehicle's wheel alignment must be checked. However, small wheel misalignments often remain unnoticed. This results in unnecessary costs due to wear and tear of the tires, damage to the casing and increased fuel consumption. This can be avoided with VAI™ from Continental.

Cross section of the indicator with depth information in mm.

Industrial Radial Tires

TerminalTransport

The all-rounder

Continental TerminalTransport is an all-rounder. This radial tire with its closed shoulder design and proven tread pattern will perform on all axle positions of a terminal tractor. It is ideally suited for an environment with newer and more even surfaces. It offers the advantages of low rolling resistance, excellent grip and traction in the wet, high ride comfort and even wear - all at a reasonable price.

High damage resistance

Tread area protects tire from cuts, chipping and chunking

Reduces the number, and most importantly the depth of any cuts and tears

Outstanding protection

Due to the belt layer, the TerminalTransport withstands highly concentrated pressures and loads

Protects the casing effectively and offers best retreadability

Usable for multiple axle positions

The special tread pattern improves the tire's self-cleaning characteristics and reduces stone-trapping (casing protection)

Combines high mileage with significant traction and optimum road suitability, whatever the weather conditions

The TerminalTransport offers an overall excellent price-performance ratio

Industrial Radial Tires

ContiRV20 Industrial

For tougher applications

The ContiRV20 Industrial is specially designed for heavy-duty forklifts used in harsh environments.

Customer benefits

Outstanding riding comfort

Smooth ride

Cut- and chunk-resistant

IC 70

For all wheel positions

The IC70 Extra Deep is the universal industrial tire for all wheel positions available from 8"+.

Customer benefits

Good traction

Excellent riding comfort

Less heat production

Energy saving

ConRad HT1

Tougher for longer service

The ConRad HT1 twin fitment solution for large forklifts.

Customer benefits

Less heat

Lower rolling resistance

Longer wear

Cost efficient

Industrial Crossply Tires

IC 40

For demanding applications in hard conditions

The tire for demanding applications, where high mileage and durability are critical.

Customer benefits

High loading capability
High tire stability
High damage resistance

IC 10 / IC 12

The universal tire for all wheel positions

The sturdy construction provides protection from tread punctures.

Customer benefits

Good ride comfort
High mileage

IC 30

Designed for unpaved surfaces

The IC30's strong lugs are constructed from a wear-resistant rubber compound, which guarantees good mileage.

Customer benefits

Good mileage
Good traction
Self-cleaning

Tubeless Sealing Ring

Improved safety and mobility

The TSR is a product which enables the mounting of tubeless industrial tires on standard industrial vehicle rims, which, because of their construction, must normally be mounted with a tube and a flap. The TSR consists of a rubber ring with an integrated tire inflation valve. The rubber ring sits on the cylindrical part of the rim between the beads of the tire, and ensures an airtight interface sealing the tire chamber, without the use of a tube and flap.

“The ContiRT20 is an extraordinarily good tire for our requirements. Just like the service from Conti. You notice they understand something about customer satisfaction.”

Roy Blanco
Site Operations Manager at iLevel
by Weyerhaeuser (Long Beach, USA)

Pioneering eco-friendly innovations

Continental works on pioneering renewable resources such as Taraxagum. For this successful initiative, Continental has received the European environment prize “GreenTec Award”. The tire manufacturer is also obliged to the European Chemicals Directive REACH that stipulates the Registration, Evaluation, Authorization and Restriction of Chemicals.

Continental Commercial Specialty Tires (CST) continuously invests in the development of sustainable innovations for economically and ecologically efficient mobility. Besides the reduction of fuel and energy consumption, the tire manufacturer focuses on enhancing the tires’ performance for an extended lifecycle. Long-lasting tires consume less energy across the entire manufacturing process and in application. In addition, Continental CST strives to utilize the most environmentally friendly raw material sources.

Continental CST will continue to work on enhancing the sustainable performance of its tires so as to make a valuable contribution to the protection of the environment and to a cleaner future.
